# THE PROBLEM

# Social distancing and lack of cooking streams

- High demand for live streaming content and few options for cooking related material
- Streaming sites don't offer tools for accessible cooking shows
- Recipes and streams live in different platforms

# THE SOLUTION

*Fresh streams served daily!*

- Users create their own digital Cookbook
- Users can schedule livestreams in advance
- Broadcasters can display the steps of the recipe so their audience can cook along with them
- Library of hundreds of recipes to broadcast with or get inspiration from!

# TECH MILESTONES

# TECHNICAL MILESTONES

- Learning WebRTC and websockets to that facilitate the live stream event
- Navigating The MealDB API
- Material-UI as css framework
- Distribution of data to multiple tables with single request
